

# MigraTEQ

*Simplify User Data Collection and Migration with TransTeQ*

The MigraTEQ FIORI application provides a user-friendly solution for collecting and managing user data during SAP system migrations. It captures essential user details, including roles and job functions, and gives users a clear overview of their responsibilities. By reducing technical complexity, it simplifies access management, minimizes errors, and ensures a smooth and transparent migration process.

## KEY BENEFITS

### Simplified migration

No need for technical expertise.

### Efficient access management

Fewer errors, higher accuracy.

### Time and cost savings

Automation speeds up user setup.

### Full transparency

Clear tracking of changes and approvals.

### Stronger security

Correct role assignment, reduced risks.

## HOW IT WORKS

### User Data Collection

Collect essential user details, job functions, and roles in the FIORI app.

### Review & Validation

Administrators verify records, correct errors, or return for revision.

### Finalization

Records are marked as "final," confirming readiness for further processing.

### Automated Migration

Backend programs create user accounts and assign roles in SAP.
